VERIFICATION OF USGS FIELD WORK PERFORMED FOR OU 3 RFI/RI - RLB-0731-92

The United States Geological Survey (USGS) is contracted to perform and report on water and sediment sampling for the Operable Unit (OU) 3 RCRA Facilities Investigation/Remedial Investigation (RFI/RI). The OU 3 work is designated as Task 2 under this IAG.

This letter confirms the invoiced tasks in the D. Johncox letter to R. H. Birk of October 30, 1992 that accompanied the USGS invoice as completed. The USGS contract was awarded July 27, 1992 and the field work portion of the contract began in August 1992. Water and sediment sampling, as defined in Sections 3.2 and 3.3 of the Statement of Work (SOW), was completed with the final water samples obtained in early October 1992. The field work tasks identified in the SOW were completed under the requirements and schedule outlined in the SOW.

Remaining deliverables under the USGS contract include: 1) a sample collection summary report as defined in Section 4.3 of the SOW; and 2) a final report required under Section 4.4 of the SOW which will provide an interpretation of the results of the field work.

If you should have further questions, please contact M. Guillaume of Remediations Project Management at 966-8557.
